

## HOW TO SHARE YOUR TEST RESULT WITH FAMILY MEMBERS:

1. Fill out the card, including your relationship to the family member you're giving it to, and provide a copy of your BRACAnalysis® test result.
2. Give a card to each family member who may benefit from the test.
3. Encourage them to show the card and your test result to their healthcare professional.

You can print additional cards at [www.bracnow.com](http://www.bracnow.com).

BRACAnalysis®

## I HAVE A FAMILY MEMBER WHO WAS TESTED FOR HEREDITARY BREAST AND OVARIAN CANCER SYNDROME

Relationship: \_\_\_\_\_

Their BRACAnalysis® test result was:

- POSITIVE**  
for a deleterious or suspected deleterious mutation  
Circle one or both: **BRCA1 / BRCA2**
- UNCERTAIN**  
(Variant of Uncertain Significance)  
Circle one or both: **BRCA1 / BRCA2**
- NEGATIVE**

**To the Healthcare Professional:** The patient who presented this card may be at risk for hereditary breast and ovarian cancer (HBOC) syndrome and should be considered for BRACAnalysis testing based on a complete family history. Some individuals may benefit from BRACAnalysis testing even though family members have a negative or uncertain test result.
