

HOW TO SHARE YOUR TEST RESULT WITH FAMILY MEMBERS:

1. Fill out the card, including your relationship to the family member you're giving it to, and provide a copy of your COLARIS® test result.
2. Give a card to each family member who may benefit from the test.
3. Encourage them to show the card and your test result to their healthcare professional.

COLARIS®

I HAVE A FAMILY MEMBER WHO WAS TESTED FOR HEREDITARY COLON AND UTERINE CANCER SYNDROME

Relationship: _____

Their COLARIS® test result was:

- POSITIVE**
for a deleterious or suspected deleterious mutation
Circle: *MLH1 / MSH2 / MSH6 / PMS2 / EPCAM*
- UNCERTAIN**
(Variant of Uncertain Significance)
Circle: *MLH1 / MSH2 / MSH6 / PMS2 / EPCAM*
- NEGATIVE**

To the Healthcare Professional: The patient who presented this card may be at risk for hereditary colon and uterine cancer syndrome and should be considered for COLARIS testing based on a complete family history. Some individuals may benefit from COLARIS testing even though family members have a negative or uncertain test result.
