

## Understanding Your Genetic Test Result

**No Mutation Detected or Favor Polymorphism**

*BRACAnalysis*<sup>®</sup>

This workbook is designed to help you understand the results of your genetic test and is best reviewed with your healthcare provider. Please verify that your test result matches the following information by looking at the patient copy of your test result or contacting the healthcare provider who ordered your test. If your test result does not match, please disregard this brochure, and contact your healthcare provider.

## Your Genetic Test Result (check the appropriate boxes below)

### THE GENETIC TEST YOU RECEIVED

COMPREHENSIVE ANALYSIS

*BRCA1*

*BRCA2*

#### Comprehensive BRCA<sup>®</sup>Analysis:

Full sequence and large rearrangement analysis of the *BRCA1* and *BRCA2* genes.

### YOUR TEST RESULT

- No Mutation Detected
- Genetic Variant, Favor Polymorphism

## Overview of Your Test Result

Mutations in *BRCA1* and *BRCA2* cause most cases of hereditary breast and ovarian cancer (HBOC), a syndrome that involves various cancers, primarily breast and ovarian.

### IF YOUR TEST RESULT IS “NO MUTATION DETECTED”

- There were no mutations or alterations detected in either the *BRCA1* or *BRCA2* gene.
- The chance that you have HBOC syndrome is significantly reduced but not completely ruled out.

### IF YOUR TEST RESULT IS “GENETIC VARIANT, FAVOR POLYMORPHISM”

- A genetic change or variant was detected in either the *BRCA1* or *BRCA2* gene.
- It is normal to see some variation in genes—not everyone is alike.
- These variants are called polymorphisms.
- Polymorphisms do not cause HBOC syndrome.
- The chance that you have HBOC syndrome is significantly reduced but not completely ruled out.

## Your Cancer Risks

- Your cancer risks should be estimated based on your negative test result and your personal and family history of cancer.
- Your healthcare provider can assist you in understanding these risks.
- The possibility remains that your cancer risks could be increased due to:
  - ◆ Other non-hereditary factors (for example: environment).
  - ◆ Another hereditary cancer syndrome.
  - ◆ A mutation in *BRCA1* or *BRCA2* that current technology cannot detect.

## Managing Your Risks

- Your test result has given you some helpful information but it is still best to manage your cancer risks based on your personal and family history.
- You and your healthcare provider can develop the most appropriate plan for your medical management.
- Your healthcare provider can help you determine whether any further genetic testing should be offered to you or to a family member.

## It's a Family Affair

- Since no mutation was found in you, most often, your relatives would not be offered BRAC*Analysis*<sup>®</sup> testing.
- In some cases, BRAC*Analysis* testing should be offered to another relative who has been diagnosed with an HBOC cancer in order to provide more information about hereditary risk in the family. Talk to your healthcare provider about this option.

Myriad has resources available to help you with your genetic test result.

- **Contact Myriad's Medical Services Department at 800-469-7423 for:**
  - ◆ Answers to questions about your test result.
  - ◆ Information about additional genetic testing for your relatives.
- **Or, visit Myriad's website for:**
  - ◆ A sample letter that can be sent to relatives who may need genetic testing can be found at [www.myriadpro.com/BRACfamilyletters](http://www.myriadpro.com/BRACfamilyletters)
  - ◆ A healthcare provider who can offer genetic testing to relatives in any state can be found at <https://www.mysupport360.com/find-provider/>

If you need a copy of your genetic test result, please contact the healthcare provider who ordered your test.

## Notes/Questions

---

## Next Steps

Please work with your healthcare provider to determine the most appropriate next steps for you.

- Obtain a copy of your test result
- Schedule consultations with appropriate healthcare providers (list below)

---

---

---

- Create a plan for medical management

---

---

---

- Share your genetic test result with your relatives
- Re-contact your healthcare provider on a regular basis for new information about HBOC
